

Installation and configuration in Firefox

The free **CNRS Click & Read** extension was developed by the CNRS and parses the web pages you visit to find document identifiers (DOI, PMID, etc.) and adds the clickable C&R logo if the resource is available from one of the configured sources.

More than 60 institutions are Click & Read partners (universities, research institutes including CNRS and *Grandes Ecoles*).

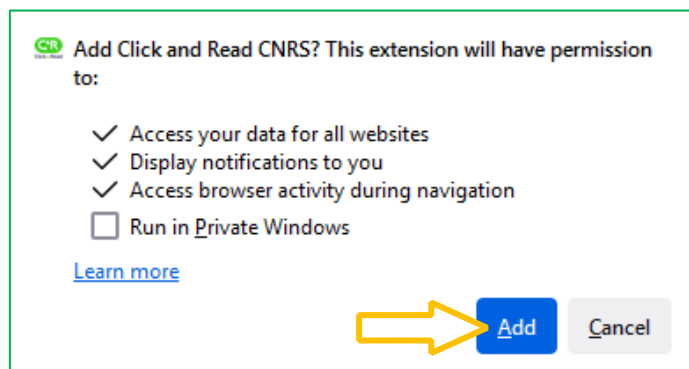

1. Install the Click & Read extension

- Click on the url : <https://clickandread.inist.fr/>
- Then on the button 
- Click on « **Add to Firefox** »

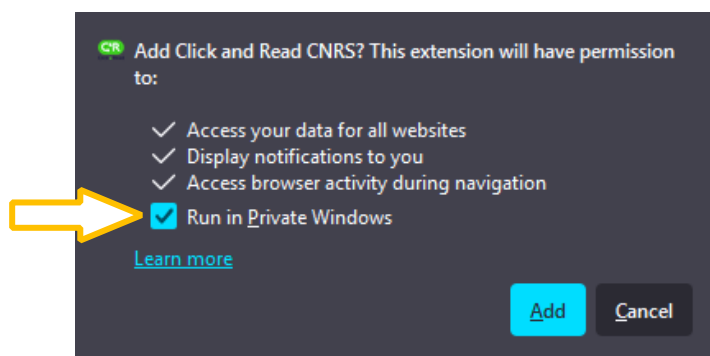

Disregard the message “This add-on is not actively monitored for security by Mozilla”: the reliability of the extension is ensured both through validation tests for publication on the Firefox Store by Mozilla, and through upgradeable and corrective maintenance of the extension's source code by INIST-CNRS. To function correctly, the Click & Read extension code parses the current web page for identifiers of document resources. If accepted on Privacy Policy setting, it collects anonymous data only for usage metrics.

- A pop-up window will appear in the top right-hand corner to indicate that the extension is about to be installed.
- If you want the extension to run in a private browser window, check the appropriate box.
- Accept the permissions by clicking on “**Add**”.

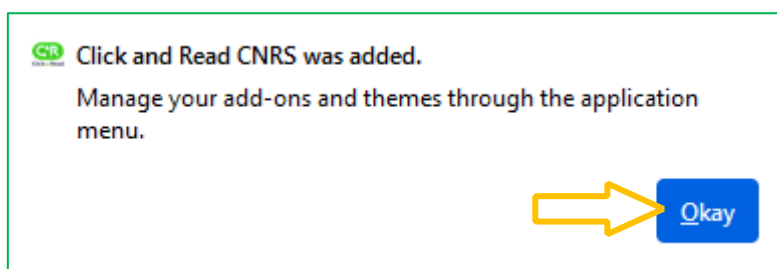

If you're installing Click & Read from a private browser window : you'll need to check "Run in private windows" to be able to set up and use the extension during private browsing (you can check or uncheck this option later using your browser's extension manager if you wish).

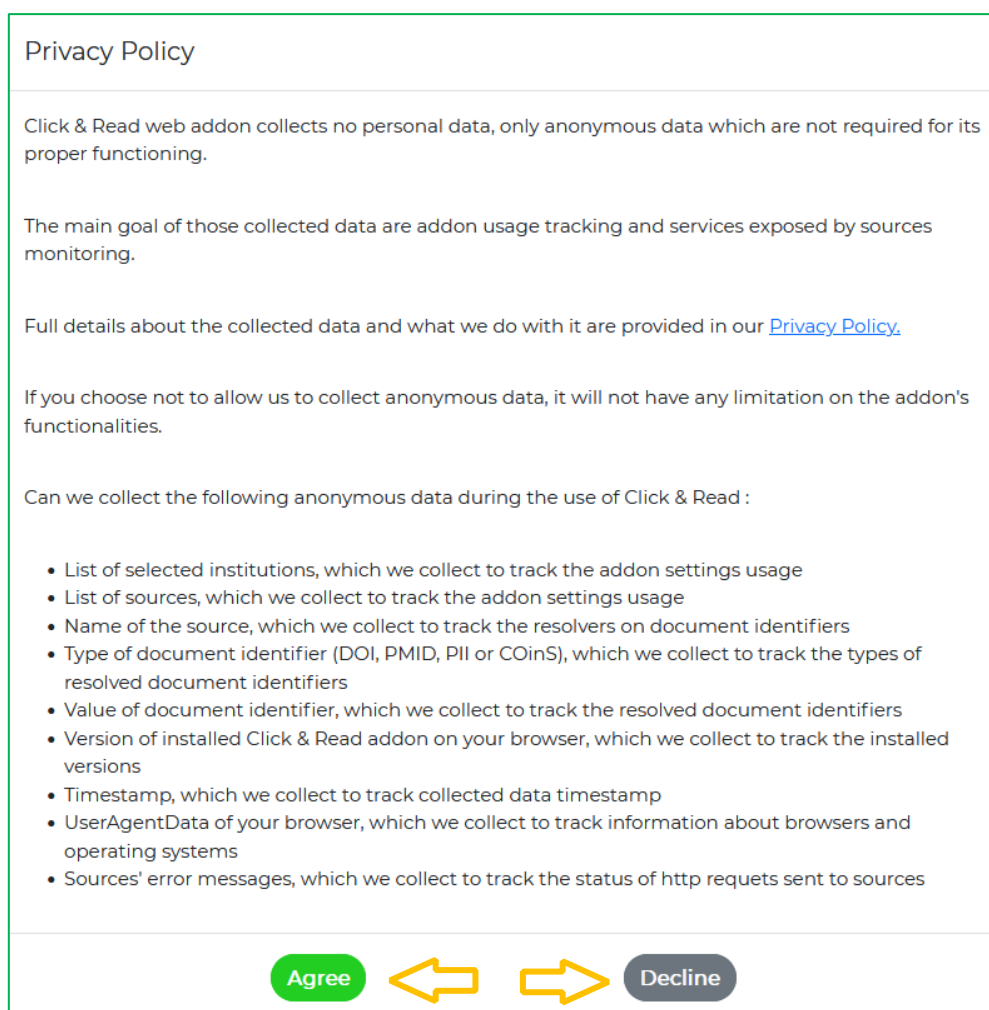

Check box required for private browsing

- Click on « **Okay** »

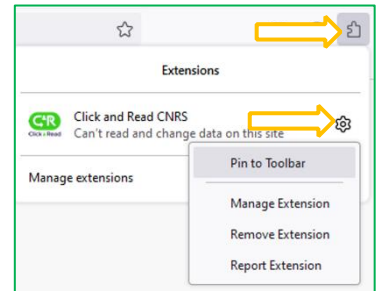

- Once the extension installed, you should have a **Privacy Policy window**, which you must Accept or Reject.

The Click & Read logo will now appear on your browser bar.

If the Click & Read logo does not appear on the browser bar, you can pin it manually by clicking on the extensions logo  and then on Click & Read settings .

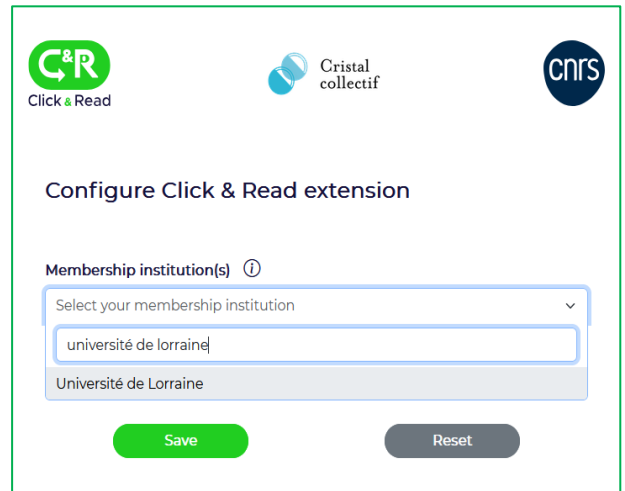

2. Set up the Click & Read extension

To access the level of service according your access rights, you must set up the extension and provide these rights before using it.

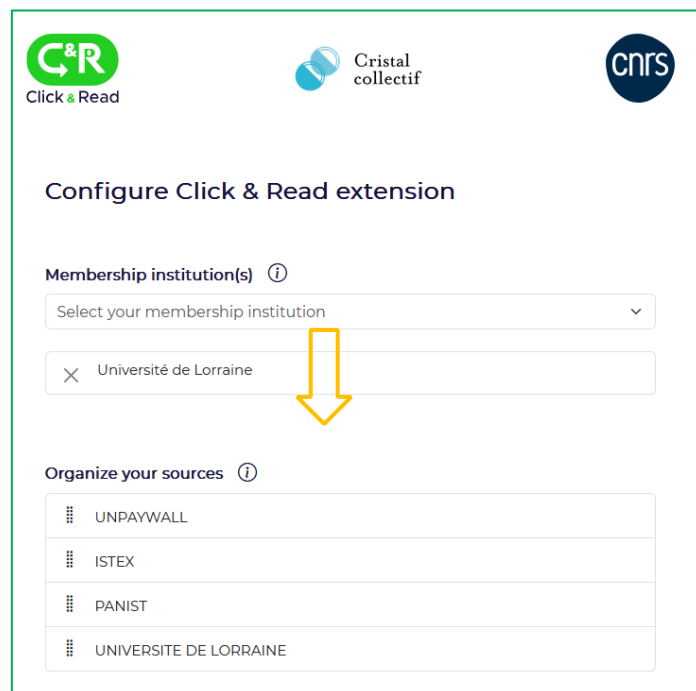

- Select **the institution(s) you belong to**, either by scrolling down the list or either by entering the name of your institution. For Example : "Université de Lorraine".

- Selecting your Institution automatically generates the sources you are authorized to access.

- In our example, the institution "Université de Lorraine" has generated the sources UNPAYWALL, ISTEEX, PANIST and UNIVERSITE DE LORRAINE.

- If you are a CNRS membership, select “CNRS” in the membership institutions' list, then check only your field(s) of affiliation on the CNRS domains pop-up

- Then you can order your sources by “Drag & Drop” by clicking on 

The order of the sources defines the order the document collections are searched in. If the first source responds, the clickable logo  is displayed ; otherwise, C&R tries the next source.

- You can activate the C&R extension in Google Scholar **by moving the slider to the right of "Enable libraries in Google Scholar"**. Please note : there is a limit of 5 libraries in Google Scholar.

Activate libraries in Google Scholar 

Activate libraries in Google Scholar 

- To save your C&R settings, click on 

- Your settings have been applied.

- The Click & Read extension is now set.
- If needed, you can reset your settings and start your configuration over by clicking on Reset

There is no search interface : Click & Read is a complementary access mode to the BibCnrs portal or your usual search space.

When you browse the Internet:

- whatever the site (Google, Google Scholar, publishers' sites, Wikipedia...)
- whatever the query (article title, authors, DOI...)
- the Click & Read extension scans the web page you're visiting, looking only for document identifiers that it finds in the selected sources. the Click & Read extension parses the web page you are visiting, looking for document identifiers only (DOI, PMID, PII...) and searches for these in the selected sources.
- then it adds the Click & Read button  when the full text is available.

Let's take the example of a web search about Covid on the Wiley publisher's page.

<https://onlinelibrary.wiley.com/journal/15532712/covid19>

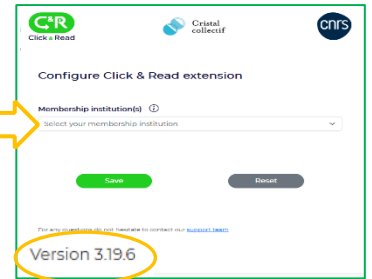

The screenshot shows the Wiley Online Library interface. At the top, there's a search bar and a navigation menu with options like HOME, ABOUT, CONTRIBUTE, and BROWSE. Below the navigation, there's a section titled "COVID-19 in Academic Emergency Medicine". Under this section, there's a list of articles. One article is highlighted with a yellow arrow pointing to a green "CR" icon, which stands for Click & Read. The article title is "Perspectives of COVID-19 vaccine-hesitant emergency department patients to inform messaging platforms to promote vaccine uptake".

You then just need to click on the  button for access to your document(s).

3. If you have a problem with the update or installation

3.1. Determine the **version of your current extension** by clicking on the logo  in the browser toolbar.

If you don't see the logo  in your toolbar, you can also obtain this information by clicking on  then on "extensions" on the left and finally on "Click and Read CNRS". The version number is shown at the bottom of the presentation.

Find out if an update is available : click on the logo , then on "extensions" in the left-hand menu, then on  and "search for updates".

If a blue dot appears, click on it to apply the update.

3.2. If an alert logo (orange triangle) appears in the top right-hand corner, click on it and then on "update" in the pop-up window :

3.3. For all other problems, **uninstall your current Click & Read extension** and reinstall the most recent version. To uninstall your extension, right-click on the logo  in the browser toolbar, then select "remove extension".

If the logo  is not present in your toolbar, you can also uninstall the extension by clicking on  then on "extensions" on the left. To remove Click & Read, click on 

To reinstall the latest version of Click & Read : follow steps 1 and 2 of this document.
